## Countermeasures to Promote the Legislation for the Management of the Atmospheric Environmental Monitoring an Example for the Jiangsu Province

ZHU De-ming  
*Environmental Protection Department of Jiangsu Province Nanjing Jiangsu 210036 China*

**Abstract** This paper outlined the evolution characteristics of atmospheric pollution and challenges that we were facing recently and at the same time pointed out the weaknesses during the management of atmospheric environmental monitoring in Jiangsu. On this basis it is put forward that we should seize the opportunity of the implementation of the "Jiangsu Province Atmospheric Pollution Prevention Act" and strengthen the functions of the government in environmental monitoring in order to make monitoring data legally and enhance environmental monitoring comprehensively. Besides it's very important to establish the management system of monitoring which takes environmental quality as goal-oriented to take strong measures against behaviors of monitoring data fraud and to accelerate the monitoring information to be out-giving exhaustively.

**Key words** Air quality Management of monitoring Legal construction System innovation
